

Permanent Lighting Buyers Guide

What every homeowner should look for before choosing a permanent lighting solution.

Before you buy, look at the company

-  – **Years in Business**
A proven track record shows stability and experience.
-  – **Local reviews and reputation**
See what your neighbors are saying.
-  – **Completed installs you can see**
Look at real homes in your area.
-  – **Long term service & Support**
Choose a company that will be there after the installation.

Ask these smart questions

- What happens if one light fails?
- Can I control separate areas of the home?
- What does warm white look like at night?
- Are there any monthly app fees?
- Who services the system after installation?
- Can I see homes with the product installed?

The cheapest system is not always the best long term value.

Choose a company, support system, and product you can trust.

What to look for in the product

Smooth even light distribution

A clean consistent look without visible hot spots.

Clean daytime appearance

Discreet and blends in with your home.

Individual light control

Control each light or section independently.

Dynamic zoning & scheduling

Set different scenes for every occasion.

App control & custom patterns

Easy to use with endless possibilities.

Reliable system design

Engineered for long lasting performance.
